**Erycare** Tablets

Erythromycin 250 mg tablets

Rx

**Erycare** Tablets

Erythromycin 250 mg tablets

Quick target pain relief.

Fast resolution of inflammation.

Normalizes fever promptly.

Indicated for the treatment of the following infections caused by susceptible strains of the designated microorganisms:

● **Upper Respiratory Tract Infections:**

Mild to moderate severity caused by *Streptococcus pyogenes* (group A beta-hemolytic streptococci); *Streptococcus pneumoniae* (*Diplococcus pneumoniae*); and *Hemophilus influenzae*.

● **Lower Respiratory Tract Infections:**

Mild to moderate severity when caused by *Streptococcus pyogenes* (group A beta-hemolytic streptococci); *Streptococcus pneumoniae* (*Diplococcus pneumoniae*); and *Mycoplasma pneumoniae* (Eaton's agent).

● ***Pertussis (Whooping Cough) Prophylaxis:*** caused by *Bordetella pertussis*.

● ***Legionnaires' Disease:*** caused by *Legionella pneumophila*.

● **Skin and Soft Tissue Infections:**

Mild to moderate severity when caused by *Streptococcus pyogenes* and *Staphylococcus aureus* (resistance of staphylococci may emerge during treatment).

● ***Erythrasma:*** in the treatment of infections due to *Corynebacterium minutissimum*.

● **The treatment of Acne vulgaris**

● **Sexually Transmitted Diseases:**

● ***Primary Syphilis:*** caused by *Treponema pallidum*. Erythromycin is an alternate choice for treatment for primary syphilis in patients allergic to the penicillins.

● ***Chlamydia Trachomatis Infection:*** Erythromycin is an alternate choice in the treatment of the infections caused by *Chlamydia trachomatis*.

*Specimens for bacteriologic culture should be obtained prior to therapy in order to isolate and identify the causative organisms and to determine their susceptibility to erythromycin.*
